

# EBP Regional Workshop:

International Workshop on ICT  
& Smart Economic Development

[Register online](#) for the [EBP Regional Workshop: International Workshop on ICT & Smart Economic Development](#), organized in by the European Regional Information Society Association ([Erisa](#)) and the [Regional Government of Extremadura](#). The goal of the workshop is to ensure you have a good understanding of the broadband project that is being developed in the Region of Extremadura and to take your views into account. This event will give you the unique opportunity to directly influence the way in which broadband technologies and associated services will evolve in Extremadura.

## [VIEW EVENT](#)

The Workshop aims at helping the Region of Extremadura with the implementation of the broadband strategy and development of Internet access in remote areas in line with the European policies and macroregional strategies. The targeted audience are people involved in policy and practice of ICT, particularly those involved in the future of the Internet, such as public sector policy makers and innovators in sectors like health, education, government, industry and e-business. Also encouraged to participate are Infrastructure owners, service providers and ISPs (Internet Service Providers), Telecoms and IT industry representatives. Other Spanish and Portugese regions are welcome to join the workshop. For more information, please contact: [antonio.recio@fundecyt.es](mailto:antonio.recio@fundecyt.es)
