Study on the conformational equilibrium of the alanine dipeptide in water solution by using the averaged solvent electrostatic potential from molecular dynamics methodology

Francisco F. García-Prieto, Ignacio Fdez. Galván, Manuel A. Aguilar, M. Elena Martín: **Study on the conformational equilibrium of the alanine dipeptide in water solution by using the averaged solvent electrostatic potential from molecular dynamics methodology**. The Journal of Chemical Physics 135, 194502. Noviembre de 2011.
