Term of use: I assume CénitS resources will be only used for the purposes and objectives set out in this form. I pledge to care for and optimize the use of the resources, as well as extreme security measures at the personal user account. I understand that the resources could not be guaranteed at peak times on the basis of equitable sharing among all users of the Centre. If resources were needed for other users and we did not use them for a continuous period of 7 days, we assume that it may be reallocated to other users who need them. In publications and research results obtained as a result of the use of LUSITANIA resources, we will cite CénitS as a supplier of these resources. Upon completion of our project, we will elaborate a report on activities undertaken in CénitS.
